Portugal

Summary

Working since 2014 on Software, I've been through every job on the field, from a ticket-grabbing developer, through full-stack, infrastructure, database management, continuous delivery, frontend and backend engineering, and even information security.

I've managed teams of 1 to 15 people of various fields of expertise such as Design, Data Science, Quality Assurance and Engineering and I was quite lucky to work with some of the best in the business.

Working directly with business owners and clients is something I have years of experience in, therefore I understand the value of translating a vision into an actionable roadmap and its features.

Bringing you value is my passion, that's why I build stuff.

Experience

Self-Employed | Freelance Software Engineer (July 2021 - Now)

I will discuss, organize and develop apps and websites for anyone that needs to bootstrap a business or kickstart an idea.

For more information please check my website: <https://artur-teixeira.tech/>

skeeled | Head of R&D (March 2017 - June 2021)

Software Engineering, Quality Assurance, UI/UX Design and Data Science team management, for the development of the best online recruitment platform.

- Lead technology teams in day-to-day operations, provide key expertise, supervise the heads of departments, and set performance goals.
- Conduct technical reviews of products or solutions to compare and evaluate their applicability.
- Contribute to the senior management team, guiding strategic decisions and resource allocation.
- Monitor management of all hardware, software, databases and licenses, maintenance, and projections of future needs.
- Integrate and communicate with third-parties to ensure processes and expectations are met.
- People Management.
- Architecture of code using engineering patterns.
- Scrum and Kanban methodologies.

skeeled | *Lead Software Engineer (November 2015 - February 2017)*

Working in the architecture, development and deployment of the skeeled web recruitment platform.

- Frontend developed in the following languages: AngularJS (JavaScript), HTML5 & Sass (CSS3). Assisted by the following tools: Grunt, NPM, Bower, Bootstrap & others.
- Backend using NodeJS & Express (previously developed in Java, assisted by Maven & Dropwizard)
- NoSQL MongoDB database - mLab online MongoDB host (MongoDB-as-a-Service)

DevOps:

- Amazon Web Services (AWS) - S3, EC2 & Code Deploy
- CodeShip - CI (Continuous Integration)
- Rollbar - error logging on various environments
- PM2 Keymetrics - real time machine overview

Other technologies include:

- git - source control
- JIRA (previously Pivotal Tracker) - project management

TOP Docs | *Full Stack Dev (April 2015 - October 2015)*

Working in the (Full Stack) development of TopDocs platform for iOS & Web.

Languages:

- Java (Android)
- JavaScript (NodeJS, AngularJS & ExpressJS)
- SASS (Bootstrap)
- PHP & ShellScript;

DevOps:

- Working in Azure Web Apps & Virtual Machines (Linux);
- Data modeling in SQL (MySQL) and NoSQL (MongoDB);
- Use of Instruments Automation tool for iOS "black box" tests;
- Extensive use of GIT version control tool;

Presence in UIKonf 2015 and Microsoft Azure Camp for BizSpark Startups about infrastructure.

Jumia Porto Tech Center (Rocket Internet) | *PHP Dev (September 2014 - April 2015)*

Supporting the development of an e-commerce application.

Working with technologies such as PHP, HTML, CSS, JavaScript, jQuery, MySQL and Solr.

Also with Yii and Zend frameworks backed by git version control.

Languages

- Native Portuguese
- Fluent English
- Limited proficiency in Spanish

Skills

- | | |
|--------------------|---|
| • Web | Node.js Vue.js HTML CSS SASS |
| • DBs | MongoDB (NoSQL) SQL Firebase |
| • Mobile | Flutter Dart |
| • Infrastructure | AWS (S3, EC2, etc) OVH (VPS) |
| • CI/CD | Jenkins |
| • Management Tools | Git JIRA Trello Miro ProductBoard Draw.io |
| • IT Security | GDPR(DPIAs) ISO Certifications Pen-Tests Cookie Law |

Education

Instituto Superior de Engenharia do Porto (ISEP)
BSc Informatics Engineering (2011-2014)

Introduction to several languages such as Assembly, C, C++, Shell Script, Flex, Bison, Java, C#, Prolog, PHP, XML, XHTML, XSLT, HTML and Oracle SQL.

Also developed notions in OpenGL, .NET, MVC, MVVM and Scrum.

In terms of Software Engineering achieved knowledge in GoF and GRASP patterns, having know-how in Architecture Diagrams such as User Stories, Class, Sequence, Domain Model, Deployment View and more.
